Jayne--

I have no further comments. It's hard for me to comment on briefing docs for you mngt since I don't know format/style they like. At NOAA, we have very strict formats and style guides about how to present info and level of detail to provide so while it doesn't match the type of briefing doc I'm used so, the content seems accurate.

Hi All,

I just updated the draft briefing paper to add a section on key messages to the state (thanks Jenny for the suggestion) and updated public comment statistics based on Allison's recent email.

Christine wanted me to develop an one pager providing an update on OR CZARA even though the OR Governor's Office meeting will focus on TMDL litigation. I would appreciate your thoughts or comments.

Thanks!

Jayne

Subject: Updated Comment Summary and Page Count

All--

See attached for an updated Excel summary of all the comments received. I added a few additional comments that we had missed.

Our total is now 85 comments from 84 individuals. 50 supportive of proposed disapproval; 21 against and 13 either did not state an opinion or wanted OR to do more to protect water quality but were opposed to penalties.

I also had someone in my office determine how many pgs each comment contained (also attached). The 85 comments (and their attachments) represent 973 pages of information (averaging ~11 pgs per comment although you can see most were in the 1-4 pg realm. NOTE: this does not include all of the 800+ attachments NWEA provided (many quite lengthy docs) or the 13 attached reports and research papers Beyond Toxics included with their comments.)

Allison
